Control method:

Smart Panel S:

SmartScreen / Apple TV:

AppleScreen:

First setup of SmartPanel S / Smart-Screen:

1. Follow the messages on the display during first setup.
2. The device needs to be paired with an external speaker to play sound correctly.

Mirror: for this purpose, access the Bluetooth interface and search for the device named **MIRROR PHONE** in the list of available devices. Once the device is connected, the sound will be played through the built-in speaker.

First AppleScreen setup

1. It is necessary to **charge the battery on your Apple device before mounting the mirror.** For this purpose, connect the mirror to the power supply, open the cover located on the back of the mirror, turn the device on using a button found on the tablet's casing.
2. Follow the messages on the display during first setup.
3. Once the device is set up, **pairing with an external speaker is required.** For this purpose, access the Bluetooth interface and search for a device named **MIRROR PHONE** in the list of available devices. Once the device is connected, the sound will be played through the built-in speaker.

First AppleTV setup

1. Follow the prompts on the display during the initial setup.
2. To properly play the sound, it is necessary to **pair the device with the internal speaker.** To do this, go to the settings, select the "Remotes and devices" tab, then in the "**other devices**" section, select "**Bluetooth**". A list of devices will appear on the screen, select "**MIRROR PHONE**".
