LED Dual Color remote control handling

User Manual of the LED Dual Color remote control

Remote control provided along with the mirror

- The remote control is automatically set on zone "1"
- It can be paired with our four devices that are equipped with a LED Dual Color band.

Pairing of the device:

- In order to pair the device, connect the mirror to the power supply first.
- Then, within 10 seconds, press the switch of the zone to which you would like to connect on the remote control.
- Once you do it, the mirror will start flashing and a colour will appear. You can change the colour according to you own preferences.

LED Dual Color remote control handling

Unpairing of the device:

- In order to unpair the device, connect the mirror to the power supply first.
- Then, within 10 seconds, press the switch of the zone that you would like to switch off five times on your remote control
- Once you do that, the mirror will start flashing which means that the device assigned to a chosen zone has been unpaired.

Main ON switch and main OFF switch:

- The main ON switch serves to activate all zones.
- The main OFF switch serves to deactivate all zones.
- If you have only one paired product, it makes no difference whether you use zone-assigned ON switches or main switches.

Zone-assigned ON switch:

- Each zone-assigned ON switch is assigned to only one product.
- The ON switch serves to activate and deactivate the zone that it is paired with.

Light colour change:

- When you turn on the light with the main switch, you will change the colour and intensity of the light for all zones.
- If you would like to change the colour or intensity of only one of the zones, press the ON switch of the given zone first and then set the chosen colour and intensity.

Specification of the remote control

Power supply:	AAA batteries (2x)
Dimensions:	85 x 45 x 23 mm
Control:	Radio-controlled 2,4 Ghz
Range:	Up to 30 meters
