Instruction / installation
manual of LED Illuminated Mirror
SLIMLINE

Thank you for buying our product. All our products are made with particular attention paid to each detail and subjected to multiple tests. We are sure that you made a purchase that will serve you for many years.

NECESSARY TOOLS

- A pencil
- A measuring tape or a ruler
- A level
- A wall plug 8 mm (included)
- L-bolts (montage hooks included)
- You will also need one person for help.
- A drill and a screwdriver
- A drill bit 8 mm

Before starting installation, read carefully the instruction manual.
The guidelines that you will find there will make installation simpler for you.

PREPARATION FOR MONTAGE

Do not place the mirror on a hard surface, since it can damage the product.

- **Do not suspend the mirror on lighting profiles.**
- **Do not suspend the mirror on pieces of furniture.**
- **Do not suspend the mirror on the ceiling.**

1. First, open the package. Remember not to place the mirror on a hard surface as this may damage the product.
2. Check if the package contains all the elements (product received according to the order, assembly elements).
3. Then take the mirror out of the packaging and place it on a soft surface (you can use a folded towel for this).
4. Make sure the product doesn't have any scratches or damages.
5. Pay special attention to the corners of the mirror, check them first by removing the protections. If necessary, contact us, do not mount the item with any damage.
6. For the assembly, secure the corners with the provided protectors again, remove them only after hanging the mirror on the wall.

Correct

Incorrect

SAFETY

Fire hazard!

Prolonged use of LED strip may cause it to become very hot. Do not place flammable objects near it. Mirrors with lighting can only be mounted on a flame-retardant or non-flammable surface.

Burn hazard!

Avoid touching the lighting as it may become very hot.

Fragile glass. Handle with care!

Take care when handling the corners of the mirror during installation, as they are particularly vulnerable to mechanical damage.

Risk of breakage!

Depending on the size of the mirror, it may be heavy. We recommend having two people assist with the mounting process.

High voltage!

Electrical installation should only be carried out by a qualified electrician.

Product usage risk!

Keep products out of reach of very young children (0-3 years). Children between 3 and 8 years old should not have access to the product unless supervised at all times.

Children over 8 years old, elderly individuals, and those with reduced physical, sensory, or mental abilities may use the products only under supervision or if they have been trained on their safe use and understand the associated risks.

Avoid Overloading!

Do not hang additional objects on the mirror. Adding extra weight could cause the mirror to fall.

INSTRUCTION FOR MOUNTING ON THE WALL

1. In order to determine the place for mounting on the wall, measure the distance between two adhesive hangers stuck to the mirror.
2. Use these measurements to mark two points on the wall that will serve you to drill holes.
3. Make sure that the distances between adhesive hangers on the mirror and points marked on the wall are the same.
4. Check whether there are no pipes or electrical cables in places that has been marked to make holes there.

INSTRUCTION FOR MOUNTING ON THE WALL

The following tools are necessary to make holes:

- A drill bit 8mm.
- A wall plug 8 mm.
- Bolts (L-hook).

5. If there are any pipes or electrical cables in the wall, find another place to mount the mirror.
Drill holes in previously marked points in the wall.
6. Once you determinate mounting places on the wall, drill holes there.

7. Place wall plugs in these holes

8. Then, screw L-hooks into the wall plugs. However, make sure that hooks are not tightened too firmly. Their function is to ensure an equal position of the mirror that should be placed at a distance of about 30 mm from the wall.

If you want to hang a mirror on a wall made of plasterboard (drywall), you should use wall plugs for this type of wall (molly studs, screw studs), not included in the set.

INSTRUCTION FOR MOUNTING ON THE WALL

9. In order to ensure that the mirror is fixed steadily, check whether L-hooks are properly mounted in eyelets of adhesive hangers.
10. Then suspend the mirror on L-hooks.

11. Once you suspend the mirror, remove protective film and plastic corners from its surface

**Make sure that electric power is disconnected
- disable the fuses!**

WARNING!

**In order to connect it to the electrical grid,
use "Wago" connector.**

**However, do not forget to proceed according
with the rules relating to work with electric
installation or use help of an electrician.**

GUIDELINES RELATING TO CLEANING AND MAINTENANCE

- In order to remove the rest of protective film from the surface of the mirror, use a solvent, acetone or a nail polish remover.
- Use only agents intended for cleaning of glass surfaces and a dry microfibre cloth for everyday maintenance of the mirror.
- Avoid cleaning glass with silicone ore acidic agents. Cleaning agents of such kind may damage surface of the glass and induce its corrosion in the future.

WARNING!

- **Do not suspend the mirror on lighting profiles.**
- **Do not suspend the mirror on pieces of furniture.**
- **Do not suspend the mirror on the ceiling.**
- **Do not stick the mirror with an adhesive tape.**
